Document 1: JP 2-119643 A (Mitsubishi Motors Corp.), 7 May 1990

Document 2: JP 7-315195 A (Mazda Motor Corp.), 5 December 1995

Document 1 cited in the international search report discloses limiting control of drive torque wherein the acceleration of a vehicle is detected, and a reference value for determining whether vehicle slip has occurred is changed according to this acceleration. Document 1 also discloses a feature wherein, when vehicle acceleration is great, the angular acceleration of a drive wheel is in a state of variation independent of slip, and thus, when the angular acceleration of the drive wheel is in a state of variation independent of slip, the reference value for detecting slip is changed.

Meanwhile, document 2 cited in the international search report discloses a feature wherein ABS control (namely, limiting control of braking torque) is not carried out when acceleration varies independently of slip. Furthermore, the inventions disclosed in document 1 and document 2 share the feature of reducing torque when a drive wheel is slipping, and thus, a person skilled in the
